

Create an entry level Yumi and/or a shooting simulator

A cheap "Yumistick"

0/09/2021 Pascal COLMAIRE

## **Necessary items**

#### Flexible rod

- oThis one is a chimney sweep
- Various diameter according to manufacturer
- Length: 5-6cm longer than the PVC tube

#### **PVC** tube

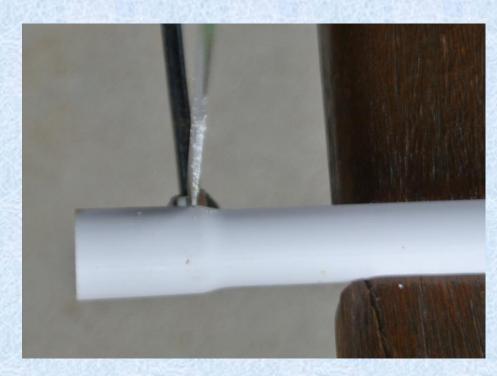

- oFor electricity or water
- Internal diameter greater than the external one of the flexible rod
- Length: 2 m to be adapted to the morphology of the users and the characteristics of the materials

30/09/2021 Pascal COLMAIRE

## **Material cutting**

### The approximately 2m long PVC tube

Remove the sleeve with a saw

Then cut it in half

# Remove this shoulder

by adjusting the desired length

0/09/2021 Pascal COLMAIF

# A little finishing

Of all PVC ends

Option:
Surfaces
to paste

Pascal COLMAIR

### **OPTIONAL:** Reinforcement of both ends

#### Bonding with suitable glue

**Chamfer** protecting the rope

Nigiri / Kyûha (bow handle) marking

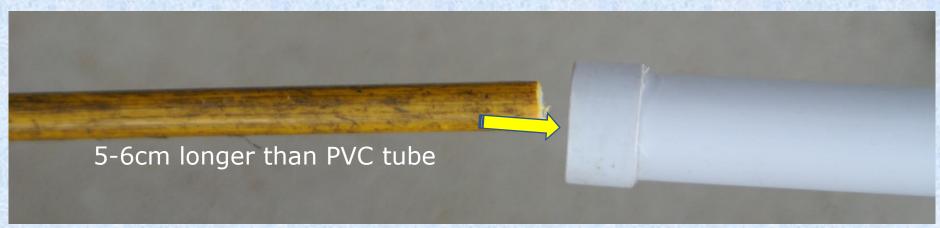

## Preparation & Installation of the flexible rod

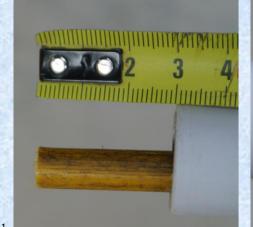

This one is used in sweeping. Available in various diameters, lengths ...

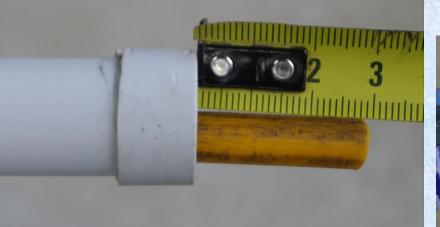

Insert it into the plastic tube

Possible without this rod, but very weak bow and the tube keeps the curvature

Cut the rod for a protrusion of 2.5 to 3 cm maximum at each end

A little silicone to hold it in place.

Test step

30/09/202

## Tsuru (string) Preparation & Installation

#### Low elasticity - Diameter = 0 3 mm

Burn the ends if necessary

Make a small loop to surround the rod

Install this loop on one end

Cut the rope to this length

However, its length depends on its stretch / elasticity

Make the other loop

# Tsuru (string) Preparation & Installation

**Bracing / Stringing** 

**Kyuha** = 24 to **25 cm** in the MIDDLE of the bow

**Optional:** Make nocking point(s)

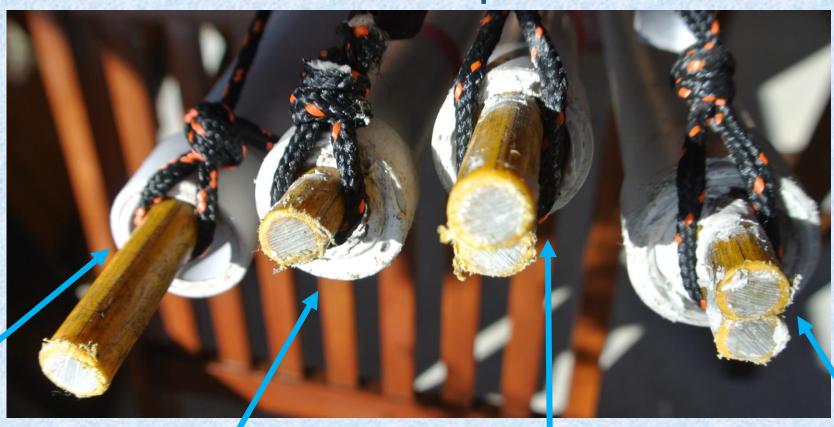

Top of the bow

Pascal COLMAIRE

# Variation of bow weight

#### Some examples

Ø 2cm plastic tube with a flexible rod

Ø 1,5cm + Ø 2cm PVC tubes with a flexible rod

Ø 2cm PVC tube with 2 flexible rods

Ø 2cm + Ø 2,5cm PVC tubes with 2 flexible tods

Note:

More tubes &/or flexibles becomes "too" heavy

30/09/2021 Pascal COLMAIR

## Multi-use at low cost, anywhere

For: Discovery stand - Entry level - Very young kids - Technical developments - Practice at home - ... / ...

Without glove, arrow and target

**But always** 

In real situation on Makiwara

with pleasure!

### Hope you find this making guide helpful!

Thank you for your suggestions for improvement, questions, comments ...
